« Passionate about data and BI, I combine analytical rigor and results-driven mindset to turn data into business performance levers. »

PROFILE

Data Analyst with 5+ years of experience in inventory management, pricing, data processing and business intelligence. Proficient in Python, SQL, SAP ERP/S4HANA/BW4HANA, Power BI, AWS, Azure Machine Learning, Winshuttle, VBA and Excel. Experienced in AI-driven predictive analytics, cloud solutions and data visualization.

WORK EXPERIENCE

GROUPE CIPANGUO — FRANCE

Aug 2025 – Present

Data Analyst

- ▶ MDM system integration and update during the Euro4x4parts–Cipanguo transition, deploying a scalable cloud solution to unify business data
- ▶ Design, maintenance and optimization of group performance dashboards: sales, product distribution, commercial results across multiple subsidiaries
- ▶ Development of AI-based predictive models to anticipate demand, improve inventory forecasts and support strategic decision-making
- ▶ Led database migration from OVH to AWS: data integrity, scalability and query performance
- ▶ Strengthened group Azure Cloud architecture with the IT team, CI/CD pipelines
- ▶ Data and technical support for Euro4x4parts, Japocat.fr, Akisung.com and Cipanguo.com — analytics, SEO performance and data quality
- ▶ Cross-functional collaboration with marketing, IT and e-commerce teams to automate processes and refine insights via Python and SQL

Power BI, Excel, Python, SQL, AWS, Azure, SAP ERP/S4HANA/BW4HANA, VBA, Databricks, Winshuttle

EURO4X4PARTS — SAINTE-MARIE-DE-GOSSE, FRANCE

Sep 2019 – Aug 2025

Data Analyst

- ▶ Inventory and master data management — data cleansing and optimization to improve accuracy and operational efficiency
- ▶ Python script development for advanced data processing, AI-based predictions and repetitive task automation
- ▶ Built Power BI dashboards and automated reporting tools for inventory tracking, supplier performance and operational KPIs
- ▶ SQL extraction and analysis from SAP ERP and S/4HANA for category managers and purchasing teams
- ▶ Cloud solution management on AWS and GCP, API integrations and big data processing
- ▶ Used Azure Machine Learning for predictive models on inventory forecasting and demand planning
- ▶ Implementation and maintenance of Winshuttle and VBA solutions for automated data entry and reporting

Python, SQL, SAP ERP/S4HANA/BW4HANA, Power BI, Excel, AWS, GCP, Azure ML, Winshuttle, VBA

LIONBRIDGE — DUBLIN, IRELAND

Nov 2019 – Apr 2023

Map Quality Analyst (Remote)

- ▶ Evaluation and validation of mapping data to ensure accuracy across global digital platforms
- ▶ Online research to verify query results and optimize geo-mapping
- ▶ Python scripts for batch processing of mapping datasets
- ▶ Coordination with internal teams to improve data quality and validation dashboards
